SA Metropolitan Fire Service

Beverley house fire update

Thursday, 11 April 2013

Two Metropolitan Fire Service (MFS) firefighters injured in a house fire earlier this week are recovering in the Royal Adelaide Hospital.

One firefighter has received approximately 40 % burns and remains in intensive care, while the other firefighter has received approximately 6 % burns and is recovering in the burns unit; however, their conditions are stable and continue to improve. It is expected that in time, they will fully recover.

The families of the injured firefighters would like to thank the paramedics, firefighters and police who assisted at the scene of the house fire, and all staff at the Royal Adelaide Hospital for their care, skill and professionalism.
